Job Description for Utility Locator

A utility locator determines where underground utilities (such as telephone, gas and power lines) should be placed and where existing utilities are located. They often work for utility, consulting and construction companies. Tasks performed by utility locators include reading maps and blueprints to determine where utilities are located, marking the location of existing utilities for future reference, and helping professionals such as utility workers, construction workers and electricians assess utilities' location in case they need to be repaired, modified, expanded or worked around.

Utility locators may use electronic detection equipment in their work, and they may regularly be exposed to heat, cold, rain and other elements of outdoor weather. The utility locator may also have to perform physical activities such as using a shovel to unearth utilities as well. At all times, these professionals must follow safety procedures and laws.

Usually, a high school diploma or equivalent is needed for this position. Experience in a similar position is often required or preferred, though some companies offer on-the-job training. The ability to stand and walk for long periods of time, to bend and stoop, and to lift heavy items is essential; it is also sometimes necessary to enter manholes. Since this job requires traveling to service locations, it is important to have a clean driving record and a valid driver's license as well. (Copyright 2018 PayScale.com)

Utility Locator Tasks

- Identify and map location and depth of utilities such as water, sewer, gas, cable, oil, and electric lines.
- Document interactions, site information and utilities in organizational software.
- Communicate with clients, engineers and management.
- Use a variety of techniques (electrical, magnetic, blueprint analysis, and/or radar) to measure utilities.

UTILITY LOCATOR JOB DESCRIPTION

Telecon Inc., a leading provider of telecommunications network infrastructure services is seeking an energetic, career-minded individual looking to take on the position of Utility Locator. This unique and exciting opportunity allows you the benefits of working outside and independently while building a long-term career. The company will provide full in-class and on-site training to ensure you have all the necessary skills required to excel in this position. In addition, you will be provided with the added benefits of a cell phone, company vehicle and gas card.

The Utility Locator plays an integral role in marking underground utilities and meeting our high-quality standards. He/she will conduct locating services for residential and commercial customers within a specified geographical area.

RESPONSIBILITIES:

- Conduct utility locates as required
- Conduct research or analyze data regarding excavation locations, construction prints and plans to determine actual lines of requested utilities
- Operate various electronic devices including use of a receiver wand and transmitter designed to assist in the locating and verifying of underground utilities including gas, phone and fiber optic cables
- Mark utility lines using spray paint or coloured flags
- Prepares various reports and documentation verifying marked utilities
- Complete locates to Promark-Telecon standards and schedules as required

REQUIREMENTS:

- Minimum high school education required
- Valid G class driver's license with clean driver's abstract
- Previous experience locating utilities an asset
- Previous construction experience an asset
- Ability to distinguish colours for marked utilities
- Ability to work with minimal supervision with strong organizational skills and attention to detail.
- Ability to carry up to 15 lbs.
- Excellent communication and problem-solving skills
- Excellent customer service skills with the ability to interact with clients, colleagues and the public
- Intermediate computer skills with knowledge of Microsoft Office products (Outlook, Word, Excel)
- Confined Space Entry training an asset

ADDITIONAL INFORMATION:

Travel is required as projects will be located throughout geographic region (Company vehicle and gas card will be provided). This is a unionized position.

PHYSICAL DEMANDS:

Must be able to perform the physical demands of the position's work tasks. This includes but not limited to, movement of equipment and/or materials; ability to carry equipment (transmitter and receiver) up to 8 lbs. each and the ability to stand or walk for extended periods of time.
